

# AccessGreenfield.org

Universally accessible, affordable high-speed connectivity is essential for Greenfield to thrive in the 21st century. That’s why a growing group of Greenfield residents and businesses are collaborating with the Town to build our own hybrid fiber/wireless broadband network, *AccessGreenfield*, which will offer a range of reasonably priced connectivity options to all the people and institutions of Greenfield.

The Town of Greenfield’s plan to build and operate a "future-proof" municipal broadband network is ambitious but realistic—many towns and regions around the U.S. have successfully done the same.

The following is taken from a report written by Chris Mitchell, Director of the Telecommunications as Commons Initiative, a program of the Institute for Local Self-Reliance (<http://www.ilsr.org/>).

*"Frustrated by ever-increasing prices for telecommunication services and the reluctance of incumbent providers to upgrade their networks to meet 21st century needs, more than 150 communities have built their own citywide cable and FttH [Fiber-To-The-Home] networks. Against great odds and in the face of ferocious opposition by the existing telephone and cable companies in the courts, at the legislature, and in the marketplace, the vast majority has succeeded."*

Through the Community Technology Advisory Council (CTAC), the Town of Greenfield is looking for your input into your current service providers. Please help us ascertain whether this is a worthy endeavor by filling out the survey.
